

Principle

Tube or solid boards with a **size adjusted to the lorry width** are hot-melt glued together in the plant **to an endless stream** and then on commission basis **cut into individual sizes**.

Advantages

Transport :

- optimal loading capacity of trucks due to the size of 800 mm or 1200 mm

Stock keeping :

- minimal stocks
- immediate deliveries possible
- simple stock disposition and material supply
- no stocking of the pre-cut boards is necessary when producing on commission basis

Production flexibility :

- efficient production on commission basis up to 1-to-1 production
- higher flexibility for special orders
- recutting for special doors is possible
